

# Community Networking Package

Often human resources are not appreciated or utilized, partly because people do not have information about each other and about what their neighborhood has to offer.

At Partners in Employment we take pride in our dedication to community. We employ local Employment Facilitators to maximize our knowledge of community and labour market information. Your client will be able to capitalize on this knowledge by properly analyzing the labour market and targeting their specific skills to the available jobs.

Partners in Employment also maintain a database of 2000+ businesses from across Huron and Perth Counties. There is a wide array of businesses in this compellation, such as, Manufacturing, Primary Industries, Trades and Transport, Sales and Service, Business and Administration, Health, Education and Government, and Arts and Culture. Making these connections will expand your client's job search capabilities. They will be well prepared to target only those individuals who have the capability of advancing their job search.

**Working with your client for up to 10 hours our Employment Facilitators will help them accomplish the following:**

- Analyzing in-depth local labour market information.
- Clarifying the skills your client has to offer and applying it to current local labour markets.
- Setting up Introduction Interviews with potential employers.
- Working with the client to ensure they create a lasting impression when meeting with potential employers.
  
- **The expected outcomes for your client include:**
- Targeting their skills to the most abundant job market.
- Having the capacity to make a solid first impression.
- Possessing invaluable contacts in their specific career market.

**The cost of the Community Networking Package is \$750.00**
